

# GrOptics Modifications

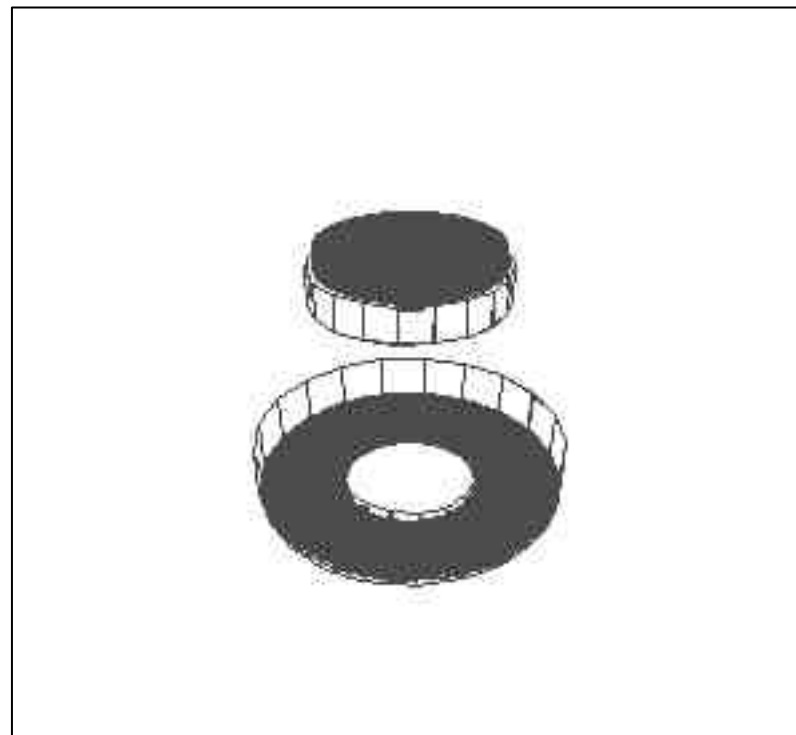

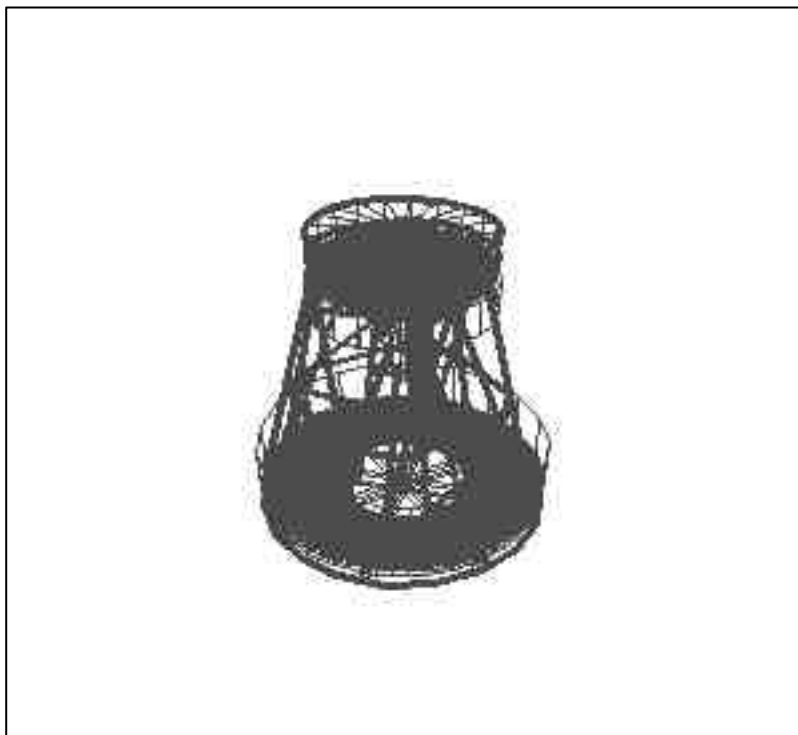

# PSegSCT vs SegSCT

# PSegSCT vs SegSCT Raytracing

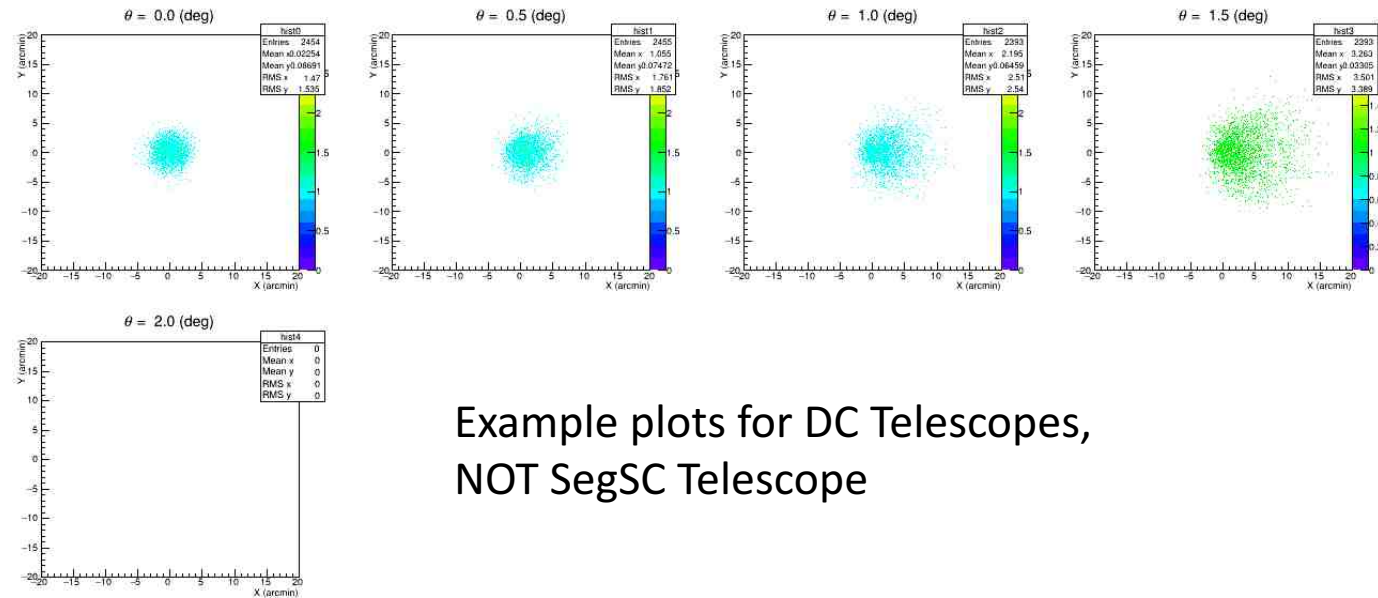

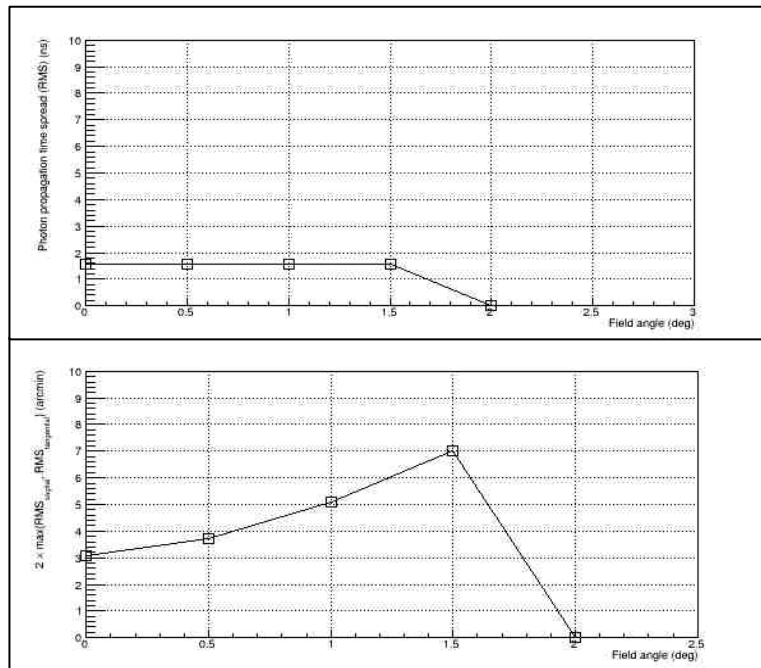

# PSegSCT vs SegSCT

# Plotting

- The plotting function TELLTEST does not work for SegSC Telescopes.
- Produces spot diagrams, rms time plots and prop delay time plots for DC Telescopes:

Example plots for DC Telescopes,  
NOT SegSC Telescope

# Interface

- Shifted most of the definitions and virtual classes from GTelescope, GTelescopeFactory and GDefinitions to corresponding GTelescope, ATelescopeFactory and ADefinitions in ROBAST.
- This causes errors when running ROBAST macros (like the examples). File linking issue. GrOptics works smoothly.
